

Hey Nadiya,

Its going well the last time with me. It nice to hear something from you again and also great to hear that you find it great to do work experience at school.

Yeah my time on holiday was very great. I have seen much beautiful places on holiday with my friends (from my old high school Emilly, Jil, Mark, Melis, Harry) in Span. We went every day on a trip and in the night to a pub or terrace. My favorite trip was when we had a activity were we played some kind of sport fusion of capture the flag.

I think a solar farm is better because people are less affected through the view and with the tubines people are affected of the view. The solar farm is a lot cheaper to build than the wind tubines. Solar farm isn't dependent of wind and wind tubines are. And wind turbines are more dangerous than solar farms because if there fall's a wind tubine than there is a big explotion. So thats what I think about it. Tanks for inviting my for your birthday next month Saturday 22nd. But unfortunately I can't come tot he party. Really sad because I oneted to come so bad.

Goodbye see you later,

Casey
