

Please have a moment, because I am very enthusiastic about your company and would like to apply for a internship at your company. First I would like to introduce myself to you, my name is Laurens Segaar, I am 17 years old and I am currently following a study Software Development at Aventus in Apeldoorn. A few of my qualities are that I can work well with people and that I have basic knowledge of commonly used programs such as PHP, Python, SQL, JavaScript, Html, CSS. I am also a real go-getter and have the patience to get thing done properly. I personally hope to find a good internship here. Where I can learn a lot about programming and to work as a Software Developer. Would there be a possible internship? If there is a possibility for the internship, what are than the options within your organization for my? And to who can I talk about that.
