

Hello my name is Laurens Segaar I am 17 years old, I live in the Netherlands with my parents, and I am currently following the study Software Development in Apeldoorn. My hobby's are driving rc cars and I like to work on mopeds. Also I would tell you about, The Traxxas Udr a amazing rc car. What is a rc car? An rc car is an radio controlled vehicle that you can control with a receiver. I would totally recommend other people to have a rc car completely the Traxxas udr. Because a few days ago I was racing against my friends who also have rc cars, with my Traxxas Udr and it was such a great experience to race to getter with my awesome rc truck the Traxxas Udr. The Traxxas Udr is the best scale driving rc car, it also looks very good is very fast it goes around 50 miles an our with a 6 cell battery. I hope that I can drive much more against my friends with my Traxxas Udr in the future than that I do now. So that's why I recommend every one to buy an rc car as the Traxxas Udr so that the can also have a great experience.
